PROFESSIONAL SUMMARY

Application Engineer and Software Developer with experience supporting enterprise and government-facing web applications, SQL database development, REST API troubleshooting, backend debugging, defect resolution, and application enhancements. Technical experience includes Java, Spring Framework, JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, Microsoft SQL Server (MSSQL), and PostgreSQL. Experienced in production support, root cause analysis, data validation, UAT, and cross-layer issue investigation.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python
Frontend: React.js, Next.js, HTML5, CSS3
Backend and APIs: Node.js, Express.js, Java, Spring Framework, REST APIs
Databases: Microsoft SQL Server (MSSQL), PostgreSQL, MySQL, Oracle, SQLite
Database Engineering: SQL queries, joins, table design, relationships, stored procedures, data validation, query troubleshooting
Tools: Git, GitHub, pnpm, Vercel, Postman, SQL Server Management Studio (SSMS), Visual Studio Code
Engineering Practices: Application support, debugging, root cause analysis, defect resolution, UAT, SDLC, production validation, application maintenance

PROFESSIONAL EXPERIENCE

E-Solutions IT Services Pvt. Ltd. | *Support Engineer* **Sep 2026 – Present**
Client: Central Drugs Standard Control Organisation (CDSCO)
Project: Online National Drug Licensing System (ONDLS)

- Support an enterprise application for CDSCO that facilitates online drug licensing workflows.
- Work with the MSSQL database layer, including SQL queries, data validation, database structure, and database-related changes.
- Investigate issues across the Java/Spring backend and MSSQL layer, and implement code fixes and application corrections.
- Perform debugging, testing, deployment validation, and production support for application and database changes.
- Developed WorkMate AI, a ticketing tool using Next.js, React.js, TypeScript, Node.js, Express.js, Prisma ORM, and PostgreSQL to support ticket creation, tracking, and management.

Adecco India Pvt. Ltd. | *Application Support Engineer* **Apr 2025 – Sep 2026**
Client: Tata Power Power Plus Ltd. (TPPPL)
Project: AMISP Smart Metering

- Supported enterprise applications through database development, API debugging, code fixes, issue resolution, and application enhancements.
- Developed the Business Associate Management System (BAMS) using React.js, Node.js, Express.js, and MSSQL for business associate and technician lifecycle management.
- Developed REST APIs and backend business logic, wrote MSSQL queries, and debugged issues across application layers.
- Supported user acceptance testing (UAT), production release validation, and enhancements across enterprise applications.

PROJECT EXPERIENCE

WorkMate AI – AI-Assisted Ticketing Tool
Next.js, React.js, TypeScript, Node.js, Express.js, Prisma ORM, PostgreSQL

- Developed a ticketing tool for creating, tracking, and managing tickets through a modular web application.
- Built the web interface using Next.js, React.js, and TypeScript; implemented backend APIs with Node.js and Express.js.
- Used Prisma ORM for database access and PostgreSQL for persistent data storage.

Business Associate Management System (BAMS)
React.js, Node.js, Express.js, JavaScript, MSSQL, REST APIs

- Developed an internal enterprise application for business associate management, technician onboarding, ID card generation, and user lifecycle management.
- Built REST APIs using Node.js and Express.js and integrated backend services with React.js frontend components.
- Implemented workflows for activation, deactivation, compliance verification, blacklist management, and role-based administration.
- Designed MSSQL database structures and developed SQL queries for application functionality and transaction processing.

Suraksha Prahari
MSSQL, SQL, Enterprise Web Application

- Supported a workforce and safety management application covering Daily Work Management (DWM) and field operations.
- Worked on the MSSQL database layer, including database creation, table structures, and relationships.
- Developed SQL queries and implemented code fixes and small enhancements while supporting UAT and production validation.

Safe Harbour
MSSQL, SQL, Enterprise Web Application

- Supported a Permit-to-Work (PTW) and field safety management platform.
- Worked on database structures, table design, relationships, and SQL-based troubleshooting.
- Implemented database fixes and small application enhancements and supported testing and UAT.

CSMI and Inventory Applications
MSSQL, SQL, Enterprise Web Applications

- Supported applications for consumer onboarding, smart meter installation, complaint management, warehouse operations, and inventory management.
- Developed SQL queries for production investigation, transaction validation, and troubleshooting.
- Analyzed application workflows and database transactions to investigate functional and data-related issues.

EDUCATION

Master of Computer Applications (MCA) **2022 – 2024**
Rungta College of Engineering and Technology, Bhilai 73.4%

Bachelor of Computer Applications (BCA) **2018 – 2021**
Maharashtra Institute of Technology, Pune 79.2%

CERTIFICATIONS

- Full Stack Java Development Certification – KodNest
- Java Spring Boot – Udemy
- Core Java Programming Certification
