Education

Rungta College of Engineering and Technology, Bhilai **Aug 2022 – July 2024**
Master's of Computer Application - - ***Percentage - 73.4*** *Bhilai, Chhattisgarh*

Maharashtra Institute of Technology, Pune **Aug 2018 – 2021**
Bachelor's of Computer Application - ***Percentage - 79.2*** *Pune, Maharashtra*

Experience

Tata Power Power Plus Limited **April 2025 – Present**
Application Support Engineer *Raipur, Chhattisgarh*

- Currently working on the Business Application Management System (BAMS), developed using the MERN stack (MySQL, Express.js, React.js, and Node.js), with a focus on full stack development and user interface optimization.
- Contributed to enhancements in the ID card management module, responsible for generating and printing ID cards for vendors and employees, streamlining administrative processes.
- Providing technical support and maintenance for critical business applications to ensure smooth daily operations and minimal downtime.
- Responsible for incident management, user access control, and regular monitoring to ensure application reliability, security, and compliance with organizational standards.
- Collaborating with cross-functional teams to monitor application performance, troubleshoot issues, and implement improvements based on user feedback.

Adyant Softtech Pvt. Ltd. **April 2024 – June 2024**
Software Developer Intern *Raipur, Chhattisgarh*

- Worked on React.js and Python with Django.
- Coordinated efforts with designers and developers to conduct 5 user testing sessions, analyzing feedback and implementing 20+ enhancements; this directly improved user satisfaction ratings and decreased onboarding time.

Projects

Clinic System | React.js, Python-Django, SQLite

- Developed a web-based clinic management system that allows patients to book appointments and doctors to manage schedules.
- Implemented a role-based authentication system for patients, doctors, and admins using Django authentication.
- Used React.js for an intuitive front-end and Django REST framework for secure data handling and API management.

4Chakka Logistic | React.js, Python-Django, SQLite

- Developed a full-fledged e-commerce logistics platform for booking and managing vehicle transportation services.
- Integrated dynamic vehicle listings, booking management, and real-time order tracking features.
- Leveraged React.js for a responsive and interactive frontend and Django for a secure backend with RESTful APIs.

RestroScan | React.js, Python-Django, SQLite

- Developed a digital restaurant menu platform where users can scan QR codes to view and place orders from their mobile devices.
- Integrated a dynamic admin panel for restaurant owners to update menu items in real-time using Django backend.
- Optimized database queries and image loading for a fast, seamless user experience.

Vehicle Insurance Database | MySql, DBMS

- A SQL Based project , included around 10 Insurance Company database.
- This project can be readily used by Insurance company.
- The database Schema is made in such a way that any general queries, which comes during Insurance claim,Renewal etc. can be resolved easily.

Technical Skills

Programming Languages: C, C++, Java, Python
Frameworks: Springboot, Django
Web Technologies: HTML, CSS, JavaScript, MERN
Database: MySQL, Oracle, SQLite
Tools: Visual Studio Code, GitHub, Postman

Achievements

– Full Stack Development Course - 719421d2-8408-44c1-ab2a-484095029a41
– Solved 200+ problems on Hacker-rank.
– Completed Java Springboot (Udemy).
– Completed Core Java Training (Certificate).
